

Each business or entity, including those that have been designated as essential under Empire State Development's Essential Business Guidance, must develop a written Safety Plan outlining how its workplace will prevent the spread of COVID-19. A business may fill out this template to fulfill the requirement, or may develop its own Safety Plan. **This plan does not need to be submitted to a state agency for approval** but must be retained on the premises of the business and must be made available to the New York State Department of Health (DOH) or local health or safety authorities in the event of an inspection.

Business owners should refer to the State's industry-specific guidance for more information on how to safely operate. For a list of regions and sectors that are authorized to re-open, as well as detailed guidance for each sector, please visit: forward.ny.gov. If your industry is not included in the posted guidance but your business has been operating as essential, please refer to ESD's **Essential Business Guidance** and adhere to the guidelines within this Safety Plan. Please continue to regularly check the New York Forward site for guidance that is applicable to your business or certain parts of your business functions, and consult the state and federal resources listed below.

COVID-19 Reopening Safety Plan

Name of Business:

Glen Cove Center for Nursing and Rehabilitation

Industry:

SNF

Address:

6 Medical Plaza

Contact Information:

516-671-9010 - Madeline Moritz - mmoritz@glencoverehab.com

Owner/Manager of Business:

Madeline Moritz - Administrator

Human Resources Representative and Contact Information, if applicable:

Madeline Moritz - Administrator

I. PEOPLE

A. Physical Distancing. To ensure employees comply with physical distancing requirements, you agree that you will do the following:

- Ensure 6 ft. distance between personnel, unless safety or core function of the work activity requires a shorter distance. Any time personnel are less than 6 ft. apart from one another, personnel must wear acceptable face coverings.
- Tightly confined spaces will be occupied by only one individual at a time, unless all occupants are wearing face coverings. If occupied by more than one person, will keep occupancy under 50% of maximum capacity.

- Post social distancing markers using tape or signs that denote 6 ft. of spacing in commonly used and other applicable areas on the site (e.g. clock in/out stations, health screening stations)
- Limit in-person gatherings as much as possible and use tele- or video-conferencing whenever possible. Essential in-person gatherings (e.g. meetings) should be held in open, well-ventilated spaces with appropriate social distancing among participants.
- Establish designated areas for pick-ups and deliveries, limiting contact to the extent possible.

List common situations that may not allow for 6 ft. of distance between individuals. What measures will you implement to ensure the safety of your employees in such situations?

Face coverings will be worn by staff as per CMS and NYSDOH guidelines.

How you will manage engagement with customers and visitors on these requirements (as applicable)?
Spacing of visit will promote social distancing of 6 feet or more. Face coverings will be mandatory.

How you will manage industry-specific physical social distancing (e.g., shift changes, lunch breaks) (as applicable)?

Staff will maintain 6ft of separation as per CMS and NYSDOH guidelines.

II. PLACES

A. Protective Equipment. To ensure employees comply with protective equipment requirements, you agree that you will do the following:

- Employers must provide employees with an acceptable face covering at no-cost to the employee and have an adequate supply of coverings in case of replacement.

What quantity of face coverings – and any other PPE – will you need to procure to ensure that you always have a sufficient supply on hand for employees and visitors? How will you procure these supplies?

We have secured an adequate supply of PPE to be used during visitation.

- Face coverings must be cleaned or replaced after use or when damaged or soiled, may not be shared, and should be properly stored or discarded.

What policy will you implement to ensure that PPE is appropriately cleaned, stored, and/or discarded?

Face coverings will be disposable. Other PPE will also be disposable. If reusable PPE is to be used disinfecting producers will be utilized.

- Limit the sharing of objects and discourage touching of shared surfaces; or, when in contact with shared objects or frequently touched areas, wear gloves (trade-appropriate or medical); or, sanitize or wash hands before and after contact.

List common objects that are likely to be shared between employees. What measures will you implement to ensure the safety of your employees when using these objects?

Rehab equipment, blood pressure cuff, etc., will be disinfected between each resident use.

B. Hygiene and Cleaning. To ensure employees comply with hygiene and cleaning requirements, you agree that you will do the following:

- Adhere to hygiene and sanitation requirements from the Centers for Disease Control and Prevention (CDC) and Department of Health (DOH) and maintain cleaning logs on site that document date, time, and scope of cleaning.

Who will be responsible for maintaining a cleaning log? Where will the log be kept?

Infection Control Preventionist maintains hand hygiene records. Housekeeping Supervisor maintains environmental cleaning records.

- Provide and maintain hand hygiene stations for personnel, including handwashing with soap, water, and paper towels, or an alcohol-based hand sanitizer containing 60% or more alcohol for areas where handwashing is not feasible.

Where on the work location will you provide employees with access to the appropriate hand hygiene and/or sanitizing products and how will you promote good hand hygiene?

Hand sanitizer is available throughout the facility and ongoing in-service and competency regarding hand hygiene.

- Conduct regular cleaning and disinfection at least after every shift, daily, or more frequently as needed, and frequent cleaning and disinfection of shared objects (e.g. tools, machinery) and surfaces, as well as high transit areas, such as restrooms and common areas, must be completed.

*What policies will you implement to ensure regular cleaning and disinfection of your worksite and any shared objects or materials, using **products** identified as effective against COVID-19?*
High-touch surface cleaning and disinfecting is done throughout the building, throughout the day.

C. Communication. To ensure the business and its employees comply with communication requirements, you agree that you will do the following:

- Post signage throughout the site to remind personnel to adhere to proper hygiene, social distancing rules, appropriate use of PPE, and cleaning and disinfecting protocols.
- Establish a communication plan for employees, visitors, and customers with a consistent means to provide updated information.
- Maintain a continuous log of every person, including workers and visitors, who may have close contact with other individuals at the work site or area; excluding deliveries that are performed with appropriate PPE or through contactless means; excluding customers, who may be encouraged to provide contact information to be logged but are not mandated to do so.

Which employee(s) will be in charge of maintaining a log of each person that enters the site (excluding customers and deliveries that are performed with appropriate PPE or through contactless means), and where will the log be kept?

Administrative Assistant maintains such information in the Administrative Assistant's office. Facility has an account of each person entering the facility.¹

- If a worker tests positive for COVID-19, employer must immediately notify state and local health departments and cooperate with contact tracing efforts, including notification of potential contacts, such as workers or visitors who had close contact with the individual, while maintaining confidentiality required by state and federal law and regulations.

If a worker tests positive for COVID-19, which employee(s) will be responsible for notifying state and local health departments?

Administrator/Director of Nursing or designee.

III. PROCESS

A. Screening. To ensure the business and its employees comply with protective equipment requirements, you agree that you will do the following:

- Implement mandatory health screening assessment (e.g. questionnaire, temperature check) before employees begin work each day and for essential visitors, asking about (1) COVID-19 symptoms in past 14 days, (2) positive COVID-19 test in past 14 days, and/or (3) close contact with confirmed or suspected COVID-19 case in past 14 days. Assessment responses must be reviewed every day and such review must be documented.

What type(s) of daily health and screening practices will you implement? Will the screening be done before employee gets to work or on site? Who will be responsible for performing them, and how will those individuals be trained?

Facility staff are screeners and have been trained and competencied. Screening taking place at front entrance before entry to resident space.

If screening onsite, how much PPE will be required for the responsible parties carrying out the screening practices? How will you supply this PPE?

Face coverings are supplied by the Facility to all screeners and any other necessary PPE. The Facility will provide necessary amount of PPE for each screener.

B. Contact tracing and disinfection of contaminated areas. To ensure the business and its employees comply with contact tracing and disinfection requirements, you agree that you will do the following:

- Have a plan for cleaning, disinfection, and contact tracing in the event of a positive case.

In the case of an employee testing positive for COVID-19, how will you clean the applicable contaminated areas? What products identified as effective against COVID-19 will you need and how will you acquire them?

Disinfecting products have been obtained via vendors. The work areas of the employee testing positive will be terminally cleaned. Only products approved by EPA to be effective against Covid-19 will be used to disinfect areas.

In the case of an employee testing positive for COVID-19, how will you trace close contacts in the workplace? How will you inform close contacts that they may have been exposed to COVID-19?

Employees testing positive in the workplace will be asked about close contacts as per the facility's policy and procedure. Schedules will also be analyzed to trace close contacts. Staff, merchants, families, etc., will be verbally notified if they were in close contact to a positive case.

IV. OTHER

Please use this space to provide additional details about your business's Safety Plan, including anything to address specific industry guidance.

-Staff training regarding Covid-19.

- Necessary PPE supplies are on hand.

-Visitation protocol will support social distancing.

-Facility will follow its policy and procedure for Visitation and Contact Tracing, Terminal Cleaning and High Touch Surfaces.

Staying up to date on industry-specific guidance:

To ensure that you stay up to date on the guidance that is being issued by the State, you will:

- Consult the NY Forward website at [forward.ny.gov](https://www.forward.ny.gov) and applicable Executive Orders at [governor.ny.gov/executiveorders](https://www.governor.ny.gov/executiveorders) on a periodic basis or whenever notified of the availability of new guidance.
